Circular No. 43 of 2021

20th August, 2021

Attention: The Chief Executive Officer
Director/Manager International Trade

Database of Organic Fertilizer Manufacturers and Importers for Potential International Collaboration Opportunities

Further to the decision made by the Government of Sri Lanka government to ensure that only organic fertilizer would be used in the agriculture sector in the country in the future, the Ceylon Chamber of Commerce is looking into the possibility of arranging Interactive Sessions and B2B meetings with Foreign Companies to enhance the availability of Organic Fertilizer in Sri Lanka.

In order to move forward with this initiative, we wish to create a Database of Companies currently engaged in or interested in manufacturing or importing Organic Fertilizer. These companies will be invited to participate at Interactive Sessions and B2B meetings with Foreign Companies in the Organic Fertilizer market.

If you wish to add your Company into this database, you are kindly requested to fill in the Google Form available at <https://forms.gle/1HnJe4XHeW7dteT28> and we will inform you of International collaboration opportunities in the Organic Fertilizer market.
